Tuesday 24th November 2020

Symposium

Novel Therapeutic Interventions for Autism Spectrum Disorder (ASD)

Autism Spectrum Disorder (ASD) previously known as Pervasive Developmental Disorders (PDD) is a neurodevelopmental disorder that begins early in childhood and lasts throughout a person's life. They are group of disorders characterized by delays in the development of socialization and communication skills and the presence of repetitive behaviors or circumscribed interests. They include Autism, Asperger's Syndrome, Childhood Disintegrative Disorder, and Rett's Syndrome. There is no known cure for ASD. Medications are used to address specific behavioral problems, early intervention including appropriate and specialized educational programs and support services plays a critical role in improving the outcome

12:30 – 15:30

Chairperson:

Prof. Saffia Effat ... Professor of Psychiatry - Ain Shams University

Prof. Maha El Sayed ... Professor of Psychiatry - Ain Shams University

Updates in pharmacological treatment of Autism Spectrum Disorder

Prof. Heba El Shahawi

Professor of Psychiatry - Ain Shams University

45 min

Autism Spectrum Disorder and Sensory Processing Disorder

Prof. Mona El Sheikh

Professor of Psychiatry - Ain Shams University

45 min

Enhancing emotional regulation skills of ASD patients

Prof. Hanan Azzam

Professor of Psychiatry - Ain Shams University

45 min

Training the parents to improve social communication of ASD patients

Prof. Nermin Shaker

Professor of Psychiatry - Ain Shams University

45 min

Wednesday 25th November 2020

Symposium

Advances in understanding addiction treatment and recovery

Substance use disorder (SUD) - commonly referred to as addiction - is a medical illness with altered behavioral, cognitive, physical, neurobiological, and affective functions associated with compulsive and repeated use of addictive substance(s), whether legal or illegal

Addiction is commonly associated with substance abuse, but behavioral addictions like internet or sex addiction are just as serious. Addiction is when a person is unable to consistently abstain from a behavior or substance. This is typically at the cost of their mental and physical health

Behavioral addictions are as serious as substance addictions. Both types result in dependency and have the same or similar negative consequences. Understanding the size and the different perspective of addiction problem as well as the medical and psychiatric comorbidities will help in minimize the addiction epidemic in our country

16:00 – 19:00

Chairperson:

Prof. Amany Haroun ... *Professor of Psychiatry - Ain Shams University*

Prof. Yasser Abdelrazek ... *Professor of Psychiatry - Ain Shams University*

Internet gaming addiction

Prof. Nahla Elsayed

Professor of Psychiatry - Ain Shams University

60 min

Medical complications of new psychoactive substances

Dr. Moahmoud El Habiby

Professor of Psychiatry - Ain Shams University

60 min

Sex addiction is it really a disorder?

Dr. Moataz Ibrahim

lecturer in Psychiatry - Ain Shams University
